Form Filler — Setup Guide

A free Chrome extension that fills job application forms in one click, including Bangladesh government (Teletalk) forms. Your information stays on your own computer.

Install (about 2 minutes)

1. **Download.**
   On the GitHub page, click the green **Code** button, then **Download ZIP**.
2. **Unzip.**
   Unzip the file and move the folder somewhere you'll keep it, such as **Documents**. Don't delete or move it later. Chrome runs the extension from it.
3. **Add it to Chrome.**
   Open `chrome://extensions`, turn on **Developer mode** (top-right), and click **Load unpacked**. Select the **form-filler-extension-main** folder. If it has another folder with the same name inside, select that inner one.
4. **Pin it.**
   Click the puzzle-piece icon next to the address bar, then the **pin** next to **Form Filler**. A gray **F** icon appears in the toolbar.

Use

1. **Open a job application** and click **F**, then **Fill this page**.
   The first time, nothing is filled yet. That's normal.
2. **Fill in the rest yourself.**
   A box appears at the bottom-right: **"Do you want to update your saved info?"** Untick anything you don't want kept and click **Save**.
3. **Next time, Fill this page** fills those answers for you.
   Always check the form before submitting. Captchas and declaration boxes are left for you.

   To enter or change your information, or add your resume: click **F**, then **Edit my information**. Every field is optional.

Update to a new version

Download the new ZIP, replace the files in your Form Filler folder, then click ↻ on the Form Filler card in `chrome://extensions`. Reload any open job pages. Your saved information is kept.

If something goes wrong

"Manifest file is missing or unreadable"	Wrong folder. Click **Load unpacked** again and open the **form-filler-extension-main** folder. If there's another folder with the same name inside, select that inner one.
"Didn't find any fields I could fill"	Reload the job page (F5) and try again.
Developer mode is greyed out	Your Chrome is managed by a school or office. Use a personal Chrome profile (profile picture → **Add**).
"Disable developer mode extensions?"	Click **Keep** or close it. This is normal for extensions not from the Web Store.
A dropdown wasn't filled	Choose it yourself and click **Save** in the box. It will be filled next time.
